

## Leading Designers of North Florida

## A Home You'll Never Want to Leave

When her work is finished and you're standing inside your beautifully designed space, Coleen Norris considers her job well done only when she hears you echo six little words: I can't wait to come home.

Flanked by a team of 8 incredible women, Coleen spends her days surrounded by a heavy dose of creativity and care. "We brainstorm together and show up with dozens of viewpoints, so when you work with one of our designers, you're getting the brain power of the entire team," she says.

Always designing for coastal living, Nesting Place Interiors uses family-friendly and innovative materials, and they introduce a wow-factor to every space. "Nothing is better

than watching our clients love their spaces," she says. "It's our job to bring joy and grasp their aspirations. . . to create spaces that they can't wait to come home to."

Driven by a code of ethics outlined in faith and values, Coleen says that because she and her team believe design sets the stage for lives well lived, they don't limit their reach to Northeast Florida. "We've partnered with a community of women in the Dominican Republic," she says. "We give back to help them build their own sustainable businesses, and it's so incredible to watch them create strong and vibrant lives," says Coleen.
